Pulse Secure

Secure Access
for the Next Generation

We make the Secure Access products that companies rely on to make their workforce more productive.

Company Overview

Put simply, we are the company that is 100% focused on delivering secure access solutions for people, devices, things and services. For years, enterprises of every size and industry have been trusting our integrated virtual private network, network access control and mobile security solutions to enable secure access seamlessly in their organizations.

Every single day, our global team are innovating our products to ensure that you can dramatically boost your workers' productivity, make a smooth and secure transition to the Cloud and ensure that your networks are protected without a burden on IT. We call it Secure Access for the next generation.

Our Partners

Pulse Secure strategic partners are part of a growing and dynamic ecosystem that brings applications and services on top of the Pulse Secure platform to market.

Pulse Secure channel partners bring the platform's enterprise security capabilities to companies of all sizes in a wide variety of industries and geographies.

20K+ customers with 18M secured endpoints	40 of the Fortune 50	500+ employees globally	13 of 15 US government cabinets	16 years of R&D and 200+ patents	80 percent of Fortune 500

Pulse Policy Secure

Policy-driven Network Access Control.

BYOD onboarding

Automated configuration of devices with settings and software for Wi-Fi, VPN, and more.

Compliance auto-checks

Enhanced assessments of endpoint device health and security state.

Threat control

Coordinated and automatic threat isolation—down to the user or device level.

Granular auditing and logging

Simplifies the diagnosis and repair of network issues that arise.

Guest access management

Ability to create time-limited guest accounts—and provide a seamless user experience.

Interoperability

Adopts and utilizes the TNCs open standard IF-MAP. Enables easy integration with third-party network and security devices.

Centralized command

High-level control, with mechanisms for synchronized configuration across many sites.

Patch assessment and remediation

Minimizes downtime through automatic remediation of patches for endpoint devices.

Pulse Connect Secure

The best mobile SSL VPN for workers.

Clientless access

Access web-based apps and virtual desktop products with nothing to install.

Group policy

Integrate with directory services, such as Active Directory and LDAP.

Strong authentication

Support for two-factor authentication, SAML 2.0, PKI, IAM and digital certificates.

Host checker

Ensure that the connecting device complies with your requirements.

Virtual desktop access

Uncomplicated Secure Access to all the VDI leader's solutions.

Granular auditing

The when, where, what and how for security as well as capacity planning.

MDM integration

Integration with 3rd party solutions to enable enhanced policy enforcement.

Single client

We reduce complexity with only one client.

Pulse Workspace

A mobile workspace for the next generation.

Application controls

Corporate apps run natively but fully secured, just as they should be.

Workspace management

Cloud-based central management with corporate directory service integration.

Device insight and security

Ensure devices aren't compromised by jail-breaking, root kit or usb debugging.

Device security

Enforce appropriate use of encryption and local PIN code complexity.

Data protection

Granular data sharing policies married with selective wipe.

Employee privacy protection

Your workers information is theirs and only theirs.

Email configuration

Auto-provision email access to free your helpdesk.

Per-app SSL VPN

Automatically connect to Pulse Connect Secure for seamless access to internal resources from specific apps.
